Meet Torshel

Torshel Storm Shelters is a leading company in the storm shelter and safe room industry.

We proudly provide installation shelters and services across Alabama, Arkansas, Florida, Kentucky, Louisiana, Mississippi, Tennessee, Texas, Georgia, and surrounding states.

Additionally, we sell and ship storm shelters throughout the continental United States.

At Torshel, we understand that investing in a tornado shelter is a critical decision, and we are committed to helping you make the right choice.

Enjoy our catalog and visit us online to see videos and detailed information about our exceptional storm shelters.

Sincerely,
Torshel Storm Shelters

OUR COMMITMENT TO **QUALITY**

Torshel uses powder coating for our storm shelters to provide superior corrosion protection, because your safety is our priority. This coating helps prevent rust and damage from moisture, ensuring your shelter remains strong and reliable for years to come.

Choosing a shelter with powder coating means:

- **Enhanced corrosion resistance:** Protection against rust, moisture, and harsh weather conditions.
- **Better value over time:** Fewer repairs and longer lifespan.
- **Peace of mind:** Knowing your shelter is built to last.

WELDED SAFE ROOM

STORM SHELTERS

If you are building a new house, Torshel can install the safe room after the concrete is cured and before the framing goes up. The best place for the unit will be a hidden closet in your master bedroom, under the stairs, or in a closet in your garage.

For existing homes, the best place to install them will be in the garage.

WELDED SAFE ROOM STORM SHELTER'S TESTS

12-Ton Resistance Test

Door Sledge Hammer Impact

Concrete 40-Ft. Drop

Vertical and Lateral Vehicle Impact

Bullet-Resistant Window

RESIDENTIAL WELDED SAFE ROOM **STORM SHELTERS**

Torshel shelters are engineered and tested to meet the highest quality standards at competitive prices. All our products are rated for EF5 tornadoes.

They come in various sizes and can fit anywhere from 5 to 24 people per unit.

Our most common stock sizes are 3'x5', 3'x7', 4'x6', 4'x8', 6'x10' and 6'x12'. If you have a large family or need more room, Torshel is offering a 8'x10' and 8'x20'. The standard height of our shelters is 6' 5".

SPECIFICATIONS

- Units meet/exceed FEMA 320-2024, FEMA 361-2024, and ICC/ANSI/NSSA 500 - 2023 protocols.
- Tested both by Texas Tech University and/or by Intertek.
- Cast iron door handle with a commercial-grade lock can be installed on either side of the shelter and allows the door to open inward or outward.
- Bullet-resistant walls and windows (handguns).
- Wheelchair accessible.
- Anchored with 3/4" diameter x 4 3/4" - 8" L HILTI bolts, one every 12", and each one with 6,250 pounds of uplift strength.
- HILTI Epoxy anchoring is also an option.
- Battery-powered LED light.
- Easy installation.
- For above-ground indoor shelters, it includes an extension cord with GFCI (Ground Fault Circuit Interrupter).

Do It Yourself

If you are located far away from us, we can ship these safe rooms anywhere in the USA, and a local contractor can install the safe room for you. Or you can pick it up at our warehouse.

Shipping costs range depending on your location and the size of the shelter.

Price of shelter only, add shipping and/or installation.
Fee to be discussed with your sales rep.

This model offers large amounts of space. In fact, you can bring small beds inside.

Torshel has installed this type of units in new constructions or in large garages.

MODULAR SAFE ROOM

STORM SHELTERS

These modular safe rooms are intended to be installed in existing homes (any room, closet, under the stairs, or in the garage) in a concrete slab with 4" of thickness or more. Please ask for 6" anchor bolts if you have carpet or hardwood floors. The best place for the unit will be a hidden closet in your home's master bedroom, under the stairs, or in a closet in your garage.

Used as Storm Shelter

The main purpose of these units is to protect their occupants from violent and severe weather conditions such as tornadoes and hurricanes.

Used as Panic Room

Having a Modular Safe Room in one's home can help families provide increased safety for elderly, young children and other vulnerable family members in the unfortunate event of a burglary, home invasion, riots, or other unforeseen threats.

Used as Safe Vault

In addition to offering personal protection, these units can be used as safe vaults for securing weapons, jewellery, or other important types of valuable household and business belongings.

Need something smaller or bigger?
We've got you covered!

OUTDOOR UNDERGROUND

STORM SHELTERS

These units come equipped with a top hatch and a gas-assisted cylinder for easy lifting.

A hydraulic jack is also included, allowing you to lift debris that may block the door.

5-7 cubic yards of concrete and steel rebar will keep the unit inside the ground and will prevent it from floating.

Prior to the installation, you must call 811 (“call before you dig”) to ensure that there are no utilities in the area where the shelter will be installed. This service is offered at no cost.

Shipping available
throughout the Continental USA

OUTDOOR UNDERGROUND **STORM SHELTERS**

SPECIFICATIONS

- These units come with one door and a gas cylinder; the steel hatch consists of a 3/16" steel plate door.
- Easy lifting door design.
- Rust-resistant coating.
- Commercial grade waterproofing.
- Coal Tar Epoxy coating to prevent corrosion.
- Built-in steps and seating, removable stairs to make extra room.
- Built-in ventilation.
- Battery-powered fans.
- Battery-powered LED lights.
- 3-ton hydraulic jack.
- Exceeds FEMA guidelines.

TORSHEL'S IN-GROUND OUTDOOR MODEL FEATURES A BULLET-RESISTANT WINDOW.

You will not feel entrapped, the window allows natural light to flow inside the shelter.
